

ARENA HARROW

RH & RHE SERIES

RHE Series for subcompact tractors

Optional drag mat for RH series

These harrows are designed for horse arena and racetrack applications. This harrow rotates in a crisscross fashion to provide complete harrow coverage. The unique turning action allows the harrow to level soil by redistributing it inward. The angle teeth on the RH series allow for some trash clearance. The RHE series is designed for smaller tractors and is constructed of 1.5" round tubing.

- ⇒ Category I three point hitch
- ⇒ Angled teeth, 3/4" x 8" long (RH)
- ⇒ Tubular steel ring 2" x 2" (RH)
- ⇒ Optional drag mat available
- ⇒ Bolt on teeth for RHE series
- ⇒ Tubular steel ring 1.5" diameter (RHE)

Model No:	Ring Diameter	Weight (lbs)	# of Teeth
RH4E	4'	150	26
RH5E	5'	170	30
RH5	5'	210	30
RH6	6'	250	35
RH7	7'	295	48
RH8	8'	335	60
