

# SELF-CONTAINED POST-DRIVER FOR SKID-STEER LOADERS

## OH-100 SPECIFICATIONS

**Drive system:**  
Hydraulic

**Hydraulic  
requirements:**  
10 to 15 gpm

**Oil reservoir:**  
5 gallon

Shaver's self-contained post-driver is the choice for farmers, contractors, ranchers, landscapers and maintenance departments. Skid-steer maneuverability allows the unit to be easily moved around buildings, storage sheds, trees and other obstacles, with minimal hydraulic power.

When the post-driver is mounted to the front of a skid-steer it is secured using the "fast-tach" bracket, then only two snap-coupled hydraulic hookups are required to operate the post-driver.

Powered by a minimum of 10 gpm, the OH-100 can drive a 4-inch to 5-inch post into the ground in less than 15 seconds. As the machine drives the posts, oil is pumped through the hookups from the post-driver's own 5-gallon oil reservoir.
